LEARN TO PLAY
The Four Pillars Learning System

Canadian author's first book

Indent Publishing is proud to introduce multiple award-winning daycare owner Susie Beghin's first book on her Four Pillars approach to childhood education

In 2012, Susie opened Alpha's Discovery Kids Preschool and Daycare and developed a unique education-focused curriculum called *The Four Pillars of Learning*.

Susie gives credit to this unique curriculum as the reason why her childcare facilities have received top prize in the local Reader's Choice Awards for several years in a row.

Susie is devoted to bringing the benefits of *The Four Pillars of Learning* to more children. She has expanded the daycare to three locations and plans to continue to reach more children to fulfill her mission to give them the best start in life.

My mission is to give children the best start in life. – Susie Beghin

Did you know that children between the ages of 0 and 6 years old learn more in those early years than they ever will again in their lives?

As a parent, your role in your child's education is crucial – you are THE most important educator for your child! The Four Pillars of Learning curriculum model provides a proven teaching method for parents of young children, and for Early Childhood Educators, to beneficially influence a child's development, including physical, cognitive, social, emotional, and spiritual well-being.

The purpose of this book is to share this teaching method with parents and educators as a tool for learning both at home and in the childcare setting. For each pillar of learning, there are strategies on how to build those skills as well as sample free play and intentional play activities – by age group, from infants to preschoolers. Although each pillar is great on its own, the real benefit comes when you combine the pillars.

This book will challenge you to tap into your inner child and become the play partner that your child truly needs!

Available now through Amazon. More information at IndentPublishing.com
